¹ Contracts including Return of Premium (ROP) feature may earn a lower interest rate than those without it.

² Amounts allocated to any of the following strategies earn interest in arrears based, in part, on the performance of the S&P 500® Index (without dividends). Interest, if any, is credited at the end of each crediting period.

³ This strategy credits interest when index performance is positive — up to a maximum of the interest rate cap in effect for that year. When index performance is flat or negative, no interest is credited for that year.

⁴ This strategy credits a predetermined trigger interest rate when index performance is flat or positive. When index performance is negative, no interest is credited for that year.

⁵ Amounts allocated to this strategy earn interest in arrears, based in part on the performance of the Citi Flexible Allocation 6 Excess Return Index. The crediting period is two years. This strategy credits interest by multiplying the index performance by the participation rate. A positive result is the interest rate for that term. If the result of that calculation is 0% or negative, no indexed interest will be credited for that term. This strategy has a participation rate declared in advance, subject to the minimum participation rate, and is guaranteed for each two-year crediting period. The crediting strategy will not reduce the contract value, even if the index performance is flat or negative.

Protective is a registered trademark of Protective Life Insurance Company, Asset Builder II is a trademark of Protective Life Insurance Company.

All non-guaranteed components of the indexing formula may change and could be different in the future. Indexed interest could be less than that earned in a traditional fixed annuity and could be zero. For product details, benefits, limitations and exclusions, please consult the contract, product guide and disclosure statement. Rates are set every two weeks and may change without notice. Depending on market conditions, rates may be set more frequently. Withdrawals and early surrenders will lower returns.

10-YEAR WITHDRAWAL CHARGE SCHEDULE					
Index		S&P 500 [®] Index ¹		Citi Flexible Allocation 6 Excess Return Index	
Interest Crediting Strategy	Fixed Rate	Annual Pt-to-Pt Rate Cap ²	Annual Rate Cap for Term ³	2-Year Participation and Spread ⁴	
Contract Value \$100,000+	1.20%	2.35%	2.25%	Participation Rate	55.00%
				Spread	0.00%
Contract Value Under \$100,000	1.05%	2.05%	1.95%	Participation Rate	50.00%
				Spread	0.00%

A minimum surrender value is guaranteed when the contract is terminated due to full surrender, death, or annuitization. This amount is calculated by:

- Taking 87.5% of aggregate purchase payments accumulated at the contract's non-forfeiture rate, which cannot be less than 1% or more than 3%, and
- Subtracting any prior aggregate withdrawals accumulated at the non-forfeiture rate.

¹ Amounts allocated to any of the following strategies earn interest in arrears based, in part, on the performance of the S&P 500[®] Index (without dividends). Interest, if any, is credited at the end of each crediting period.

² This strategy credits interest when index performance is positive — up to a maximum of the interest rate cap in effect for that year. When index performance is flat or negative, no interest is credited for that year.

³ When market performance is positive, this strategy credits interest equal to the market index performance — up to a maximum of the interest rate cap in effect for that year. This option guarantees the interest rate cap to be locked in and remain constant for the entire withdrawal charge period, then subject to change annually thereafter. When market performance is flat or negative, no interest is credited for that year.

⁴ Amounts allocated to this strategy earn interest in arrears, based in part on the performance of the Citi Flexible Allocation 6 Excess Return Index. This strategy credits interest by multiplying the index performance by the participation rate and subtracting the spread. A positive result is the interest rate for that term. If the result of that calculation is flat or negative, no indexed interest will be credited for that term. The participation rate is declared in advance, and guaranteed for each two-year crediting period, subject to the minimum participation rate. The spread is guaranteed to remain 0% for the life of the contract.

Protective Guaranteed Income is a limited flexible premium deferred indexed annuity contract issued under contract form series FIA-P-2010 and FIA-P-2011. A minimum surrender value is guaranteed when the contract is terminated due to full surrender, death, or annuitization. This amount is calculated by:

- Taking 87.5% of aggregate purchase payments accumulated at the contract's non-forfeiture rate, which cannot be less than 1% or more than 3%, and
- Subtracting any prior aggregate withdrawals accumulated at the non-forfeiture rate.

- ¹ Amounts allocated to this strategy earn interest in arrears based, in part, on the performance of the S&P 500® Index. The interest credited is equal to the percentage change of the index up to the interest rate cap, but not less than 0%. The interest rate cap is first set when you purchase the contract and thereafter, annually at the beginning of each contract year. When market index performance is flat or negative, no interest is credited for that year.
- ² Amounts allocated to this strategy earn interest in arrears based, in part, on the performance of the S&P 500® Index. The indexed interest rate is first set when you purchase the contract and thereafter, annually at the beginning of each contract year. This strategy credits a predetermined trigger interest rate when market index performance is flat or positive. When market index performance is negative, no interest is credited for that year.
- ³ When market index performance is positive, this strategy credits interest equal to the market index performance — up to a maximum of the interest rate cap in effect for that year. This option guarantees the interest rate cap to be locked in and remain constant for the entire withdrawal charge period, then subject to change annually thereafter. When market performance is flat or negative, no interest is credited for that year.
- ⁴ Amounts allocated to this strategy earn interest in arrears, based in part on the performance of the Citi Flexible Allocation 6 Excess Return Index. The crediting period is two years. This strategy credits interest by multiplying the index performance by the participation rate and then subtracting the spread. A positive result is the interest rate for that term. If the result of that calculation is 0% or negative, no indexed interest will be credited for that term. This strategy has a participation rate declared in advance, subject to the minimum participation rate, and is guaranteed for each two-year crediting period with a spread that is guaranteed to remain 0% for the life of the contract. The crediting strategy will not reduce the contract value, even if the index performance is flat or negative.

This annuity rate notification is intended only as a summary of the current rates and indexing strategies offered for the listed product(s). The insurance company sets interest rates at its sole discretion and cannot guarantee or predict future interest rates. All non-guaranteed components of the indexing formula may change and could be different in the future. For product details, benefits, limitations and exclusions, please consult the contract, product guide and disclosure statement. These documents describe the terms and conditions that control the insurance company's contractual obligations. Indexed interest could be less than that earned in a traditional fixed annuity, and could be zero.

¹ The 6-Month and 12-Month rates apply to the declining balance of Purchase Payments remaining in the 6-Month and 12-Month DCA Accounts, respectively.

² "Dollars Credited" represents the total amount of interest credited (including the compounding of interest) over the stated time period per \$1,000 of Purchase Payment invested in the DCA Account. It takes into account the periodic transfers out of the DCA Account. Amounts transferred to the variable accounts are subject to fees and charges from the insurance company and the investment managers. "Dollars Credited" will vary depending on the interest rate, the amount invested, the actual investment date and the timing of the DCA transfers. Quoted rates do not reflect the effects of any applicable surrender charge or the annual contract maintenance fee.

Dollar cost averaging involves continuous investments in securities despite fluctuating market conditions. Investors should carefully consider their financial ability to invest through periods of low prices. There can be no assurance that dollar cost averaging will reduce investment cost, result in a profit, or protect against losses in declining markets.

The Fixed Account and the DCA Accounts may not be available in new contracts at all times and may not be available in all states. State variations and other conditions may apply.
