<sup>1</sup> Contracts including the Return of Purchase Payment (ROP) feature may earn a lower interest rate than those without it.

<sup>2</sup> Amounts allocated to this strategy earn interest in arrears based, in part, on the performance of the S&P 500® Index. The indexed interest credited is equal to the percentage change of the index up to the interest rate cap, but not less than the guaranteed minimum interest rate applicable to the contract, which is set at contract issue. The interest rate cap is first set when you purchase the contract and thereafter, annually at the beginning of each contract year and will not be less than the minimum interest rate cap. When market index performance is flat or negative, the guaranteed minimum interest rate will be credited. Please see contract for more information.

<sup>3</sup> Amounts allocated to this strategy earn interest in arrears based, in part, on the performance of the S&P 500® Index. The strategy credits a predetermined trigger interest rate when market index performance is flat or positive. The trigger interest rate is first set when you purchase the contract and thereafter, annually at the beginning of each contract year and will not be less than the minimum trigger rate applicable to the contract. When market index performance is negative, the guaranteed minimum interest rate, which is set at contract issue, will be credited. Please see contract for more information.
